

December 1, 2024

Dear Customer,

As part of our Signature Polymers initiative to enhance and simplify our portfolio of brands to be more helpful to our customers, we will be changing our grade names to reflect their attributes and performance.

The following grades that you purchase from us, and which are set out in the Attachment to this letter, will be changing names January 25, February 22, and March 29, 2025, depending on the region as we transition the names on our linear low density polyethylene production lines around the world.

We would also like to provide further information regarding the change in grade names:

- We confirm there is no change to the product itself (including any changes to the specifications, additives, feed, or manufacturing location) as this is only a naming/numbering change.
- At this time, we will maintain both the current and the new names on documentation such as the Safety Data Sheet, order documentation, and Certificate of Analysis. Customers will be able to order / receive using both names for a few months following the transition, until further notification from us.
- Grades with submissions, registrations, or certifications, including but not limited to FDA Drug Master File, Health Canada LONO, and NSF remain valid. ExxonMobil is working with those regulatory bodies to reflect the new naming convention.
- As these name changes do not affect the validity or obligations under existing sales agreements, we do not anticipate any amendments to such agreements due solely to the name changes.

If you have any questions or need additional information, please contact your ExxonMobil Sales Representative or Customer Account Specialist.

A handwritten signature in blue ink that reads "Melanie Cox".

Melanie Cox

Global Linear Low Density Polyethylene Optimization Manager
ExxonMobil Product Solutions
